you've never seen what you've always needed to know until now invisible forces are at work they push and shove on everything you buy or sell they affect every concept you want to take to market all the suppliers you'll deal with and every customer you'll ever see to be successful you need to understand them see them in detail in ways not possible with other methods hypernomics using hidden dimensions to solve unseen problems discovers that markets behave according to previously unknown laws set by the buyers and sellers within them it reveals those rules and how to detect describe and deploy them to your advantage it doesn't change economics so much as reveal it it's like a microscope looking at pond water a telescope tilted to the sky sonar scanning the bottom of the ocean hypernomics lets you see into markets in ways you can't with the unaided eye

sailors never navigate without a map you shouldn't either since your ship could wind up on the rocks hypernomics gives you the means to create market maps that show you where they have openings and how to fill them by giving customers what they want don't have and can afford it finds their thresholds and limits and responses to every possible feature in any product you can offer the interactions hypernomics describes have been with us since the dawn of humanity now you can finally see them and enjoy the advantages your competitors do not have validated by 13 published papers multiple awards a patent and customers such as nasa lockheed martin virgin galactic and a restaurant down the street only hypernomics gives you the ability to solve problems as varied as how could a restaurant increase revenue by 25 by rearranging seating how do you find describe and capitalize on open spaces in your market what happens when an nfl player decreases his forty yard dash time by a quarter of a second if you tried to exceed a market's limitations how could you lose 1b how do markets change over time know what you need to discover hypernomics

the 7 volume encyclopedia of biodiversity second edition maintains the reputation of a highly regarded original presenting the most current information available in this globally crucial area of research and study it brings together the dimensions of biodiversity and examines both the services it provides and the measures to protect it major themes of the work include the evolution of biodiversity systems for classifying and defining biodiversity ecological patterns and theories of biodiversity and an assessment of contemporary patterns and trends in biodiversity the science of biodiversity has become the science of our future it is an interdisciplinary field spanning areas of both physical and life sciences our awareness of the loss of biodiversity has brought a long overdue appreciation of the magnitude of this loss and a determination to develop the tools to protect our future second edition includes over 100 new articles and 226 updated articles covering this

multidisciplinary field from evolution to habits to economics in 7 volumes the editors of this edition are all well respected instantly recognizable academics operating at the top of their respective fields in biodiversity research readers can be assured that they are reading material that has been meticulously checked and reviewed by experts approximately 1 800 figures and 350 tables complement the text and more than 3 000 glossary entries explain key terms

this project contains three major parts in the first part a digital computer simulation model was developed with the aim to model the traffic through a freeway work zone situation the model was based on the arena simulation software and used cumulative interarrival times as the input its aim was to determine the traffic volumes through the work zone and the queue lengths in advance of lane restrictions the program was designed to handle up to 15 miles in length up to six lanes and up to 20 entrance and exit ramps the developed program has not been validated due to the lack of reliable field data and the program appears to produce unreasonably short queue lengths and low exit ramp traffic counts compared to the input traffic data for cases where the exit ramps are spaced closely together in the second part a diversion analysis was performed to determine the effects of closed ramps the work zone sites were assigned by ohio department of transportation and the diversion effects for these situations were in one case very minimal and in the other case as expected traffic shifted to the next open exit ramp in the third part guidelines for ramp management and ramp metering were established on a 24 7 basis giving special considerations to freeway mainline throughput and local traffic access to freeway

a new and revised version of this best selling reference for over eighteen years best selling cancer nursing principles and practice has provided oncology nurses with the latest information on new trends in the rapidly changing science of oncology now in its seventh edition cancer nursing has been completely revised and updated to reflect key new developments new topics covered include targeted therapy hypersensitivity reactions mucositis and family and caregiver issues with 27 new chapters featuring insights from key authors the seventh edition is a must have resource for every oncology nurse

war related separations challenge military families in many ways the worry and uncertainty associated with absent family members exacerbates the challenges of personal social and economic resources on the home front u s military operations in iraq and afghanistan have sent a million service personnel from the u s alone into conflict areas leaving millions of

spouses children and others in stressful circumstances this is not a new situation for military families but it has taken a toll of magnified proportions in recent times in addition medical advances have prolonged the life of those who might have died of injuries as a result more families are caring for those who have experienced amputation traumatic brain injury and profound psychological wounds the department of defence has launched unprecedented efforts to support service members and families before during and after deployment in all locations of the country as well as in remote locations stress in u s military families brings together an interdisciplinary group of experts from the military to the medical to examine the issues of this critical problem its goal is to review the factors that contribute to stress in military families and to point toward strategies and policies that can help covering the major topics of parenting marital functioning and the stress of medical care and including a special chapter on single service members it serves as a comprehensive guide for those who will intervene in these problems and for those undertaking their research
