this handbook exploits the profound experience and expertise of well established scholars in the empirical software engineering community to provide guidance and support in teaching various research methods and fundamental concepts a particular focus is thus on combining research methods and their epistemological settings and terminology with didactics and pedagogy for the subject the book covers the most essential contemporary research methods and philosophical and cross cutting concerns in software engineering research considering both academic and industrial settings at the same time providing insights into the effective teaching of concepts and strategies to this end the book

is organized into four major parts in the first part the editors set the foundation with two chapters one laying out the larger context of the discipline for a positioning of the remainder of this book and one guiding the creation of a syllabus for courses in empirical software engineering the second part of the book lays the fundamentals for teaching empirical software engineering addressing more cross cutting aspects from theorizing and teaching research designs to measurement and quantitative data analysis in the third part general experiences and personal reflections from teaching empirical software engineering in different settings are shared finally the fourth part contains a number of carefully selected research methods presented through an educational lens next to the chapter contributions themselves that provide a more theoretical perspective and practical advice readers will find additional material in the form of for example slide sets and tools in an online material section the book mainly targets three different audiences 1 educators teaching empirical software engineering to undergraduate postgraduate or doctoral students 2 professional trainers teaching the basic concepts of empirical software engineering to software professionals and 3 students and trainees attending such courses

socio economic issues are quite common in any democratic country and in india the main issue is power this has been a controversial issue for ages so the opinions are critical and varied concrete opinions are the result of concrete knowledge and the base of it is proper school education schools must be the abode of transformation of wealth of knowledge and skills for generations ahead however the role of institutions becomes more challenging in the modern world with innovations and technological developments investment in education and educational institutions should be viewed as an investment for economic prosperity the book discusses a design based research focused on what beliefs understanding and intentions future citizens in india have towards generating power from nuclear power and to what extent a 5e model intervention programme can influence it

this book explores the application of agile and lean techniques originally from the field of software development and manufacturing to various aspects of education it covers a broad range of topics including applying agile teaching and learning techniques in the classroom incorporating lean thinking in educational workflows and using team based approaches to student centred activities based on agile principles and processes demonstrating how agile and lean ideas can concretely be applied to education the book offers practical guidance on how to apply these ideas in the classroom or lecture hall as well as new concepts that could spark further research and development
