in the 1970s tactical nuclear warfare was a topical issue the introduction of the new generation of tactical nuclear weapons into europe could have had disastrous consequences these new weapons had already been developed by nuclear weapon laboratories and pressures were growing for their deployment on first sight smaller and more accurate nuclear weapons may seem more humane and militarily preferable to the relatively high yield tactical nuclear weapons currently deployed but some of these new types of weapons would blur the distinction between nuclear and conventional weapons and their use would make escalation to strategic nuclear war extremely likely indeed the argument for these new weapons is that their use in wartime is more credible and therefore acceptable than current types of tactical nuclear weapons this perception could easily lead to the exceedingly dangerous idea that some types of tactical nuclear war were winnable the fact has to be faced that any use of nuclear weapons is almost certain to escalate until all available weapons are used to believe otherwise is to believe that one side will surrender before it has used all the weapons in its arsenal history shows that this is most unlikely to happen because of its importance sipri organized a meeting to discuss the whole question originally published in 1978 this book is the outcome of that meeting

covers the period from 1790 to 1905 in the times of london

this is the eighth edition of the classic work on the royal ancestry of certain colonists who came to america before the year 1700 and it is the first new edition to appear since 1992 reflecting the change in editorship from the late walter lee sheppard jr to his appointed successors william and kaleen beall like the previous editions it embodies the very latest research in the highly specialized field of royal genealogy as a result out of a total of 398 ancestral lines 91 have been extensively revised and 60 have been added

while almost all lines have had at least some minor corrections amounting altogether to a 30 percent increase in text previous discoveries have now been integrated into the text and recently discovered errors have been corrected and for the first time thanks to the efforts of the new editors this edition contains an every name index replacing the cumbersome indexes of the past in addition to alfred the great charlemagne malcolm of scotland and robert the strong descents in this work are traced from the following ancestral lines saxon and english monarchs gallic monarchs early kings of scotland and ireland kings and princes of wales gallo romans and alsatians norman and french barons the riparian branch of the merovingian house merovingian kings of france isabel de vermandois and william de warene

have heterosexual relationships become more intimate and equal over the past forty years simply put this is the central question underpinning this book within the context of late modern social processes including most notably individualization and detraditionalization authors such as giddens beck and beck gernsheim and bauman have come to focus on a posited transformation of personal relationships this has culminated in a sociological debate over the nature of contemporary relationships with proponents of change celebrating the emergence of an intimacy based on personal satisfaction rather than traditional obligations detractors reject this interpretation and instead lament what they consider to be the destruction of commitment and the demoralisation of personal relationships by the rise of individualism and consumerism while these two entrenched positions have dominated the debate a third marginalised perspective has emerged which questions the extent to which contemporary relationships have become detraditionalized and emphasises evidence of continuing gender inequalities this book is essentially a qualitative empirical investigation of the changes and continuities posited within the debate which evaluates existing work and details the findings of van hooff s research into the relationships of two generations of heterosexual couples it provides the reader with a grounded interpretation of the evidence questioning to what extent lived reality has matched the rhetoric within contemporary relationships
