professor wilson baker f r s organic compounds are classified as aliphatic carbocyclic or heterocyclic though in the very many cases where two or more such characteristic groupings are present the classification chosen will depend on the relative chemical importance of these groupings to the particular investigation in hand and perhaps even to the outlook of the investigator traditionally however ring compounds with attached aliphatic groups are referred to as cyclic and any heterocyclic grouping serves to categorise a molecule as heterocyclic in these reviews it is the intention to deal so far as possible with carbocyclic compounds only as borne out by this volume i of the series with articles on the benzdine rearrangement the bicyclo 3 3 1 nonanes feist s acid and the annulenes the difficulty in keeping rigidly to carbocyclic substances is however apparent in the chapter on the biosynthesis of carbocyclic compounds where many heterocyclic compounds are encountered as is

inevitable in any reasonably comprehensive account of biosynthesis

the 29th volume of the series presents yet again an exemplary survey of a wide range of current topics in medicinal chemistry and pharmacology eight expert reviews emphasize the relationships between chemical structure and pharmacological activity these detailed discussions of some of the most exciting developments in the field today will prove of great value to future research the book begins with a study of anti inflammatory activities of 5 lipoxygenase inhibitors followed by an overview of the antiarrhythmic therapeutic possibilities offered by class iii electrophysiological agents structures and activities of some opioid ligands are surveyed and the investigation into pharmacologically active pyridazine derivatives is continued dopamine d2 receptor agonists offer exciting therapeutic potential as do ondansetron and related 5 ht 3 antagonists the herbal origin of many modern drugs is yet again reflected in a survey of the herb feverfew the volume concludes as it began with enzyme inhibition in this case concerning synthetic inhibitors of interstitial collagenases
